

DOCK SPACE

There is a lot of dock space at Scott Point. However, Members should still try to minimise space between vessels when space is getting tight. Try to keep 'H', 'J', and 'K' docks for larger vessels until other space has been used. 'A' dock is for dinghies and tenders which should not be tied to main docks. Please keep the end of 'A' dock free for floatplane access. There is a gravel and mud boat launch located at the south end of the marina, however, there is very limited storage for boat trailers. Anyone wishing to store a boat trailer must first contact the Station Manager. There is a pump-out station.

WATER

Even with a watermaker, water is a precious commodity in the Gulf Islands and must be conserved at all times. Please keep showers short, and limit the amount of water when filling boat tanks. There is no boat washing at any time.

WASHROOMS & LAUNDRY

Please use the washrooms located ashore. There is a separate building with ladies' and men's washrooms and two showers. There is an additional washroom, with bathtub, located in the pavilion.

There are three washers and dryers at the west end of the Washroom Building provided at no cost to Members. Members should limit their use of the machines when others are waiting, and remove their laundry when it is finished.

PARKING

There is a small parking lot. Park in designated areas only. If the parking lot is full, please park along Scott Point Drive.
